Rome awards \$2M contract to SAIC for software study

by Francis L. Crumb, Information Directorate

ROME, N.Y. — The Air Force Research Laboratory has awarded a three-year, \$2,090,339 contract to Science Applications International Corp. of San Diego, Calif.

The agreement, “Advanced Processing and Concepts for Multifunction Sensors,” will result in a software study and algorithm development work to enhance space-based radar and

other surveillance technology, according to Peter A. Zulch, program manager in the Sensors Directorate at the Rome Research Site.

The contract was negotiated by AFRL’s Information Directorate Contracting Division. @
